

Quarterly Report for the Period ending 31 March 2008

Corporate

As indicated in the previous quarterly report, the Company has adopted a strategy of continuing exploration at the Bushranger Copper Project, and growing the Company through further acquisitions within the resource sector. The acquisition strategy is focussed in the bulk commodities (coal), copper and gold sectors.

The Company has been investigating several investment opportunities within the South Africa coal industry. There are significant opportunities to build a medium sized coal business in South Africa and the outlook for both coal demand and price are excellent. The Company has conducted due diligence on several coal assets in South Africa and continues to hold discussions with the vendors of these assets. No agreements have been reached with the vendors at the time of this report and the Company will inform the market should such agreement be reached.

As part of the Company's strategic focus, Mr. Kees Dekker has been appointed as the Company's Regional Manager – Southern Africa. Kees has 29 years of experience in the international mining industry, with a large majority of that time spent in Southern Africa and South America. Kees has held a number of senior managerial positions in both large and junior mining companies, providing him with a wealth of knowledge and experience from his involvement with the evaluation of mining projects and technical valuations. He was most recently employed as Audits Manager for RSG Global based in Johannesburg and previously spent 22 years with Goldfields of South Africa where he held the positions of Section Head - Coal and Base Metals Evaluation and Regional Manager for North and West Latin America.

On 30 January 2008, 33,333 unlisted options exercisable at \$6.45 each expired. No other share or option placements were undertaken during the quarter

Bushranger Copper Project

Drilling has started to test the IP survey targets at the Footrot Prospect. Drilling of up to five holes, each around 250m deep is planned initially, with further drilling dependant on the first phase results.

The Company recently completed an induced polarisation (IP) survey at the Bushranger Exploration Project (EL5574) in the Lachlan Fold Belt of New South Wales. The survey focussed on an area at the southern end of the tenement, known as the Footrot Prospect, approximately 6km to the south-east of the Racecourse Prospect.

Most of the work completed to date at Bushranger has been at the Racecourse Prospect. North Limited completed an IP survey early in the target phase of the Racecourse Prospect that provided an accurate location of sulphide mineralisation. Subsequent drilling proved that the IP response was associated with copper mineralisation, verifying the IP survey results. Between 2003 and 2006, Straits Resources Limited completed over 6,000 metres of RC and diamond drilling. Resource modelling completed in 2006 provided an Indicated and Inferred Resource of 27.6 Mt at 0.45% Cu at the Racecourse Prospect.

In contrast, since 2003 only 384 metres of RC drilling (4 holes) and 122 metres of shallow aircore were completed at the Footrot Prospect. Other exploration over Footrot included soil geochemistry and aircore drilling (187 holes) completed by North Limited between 1993 and 1998. The Company reviewed all the available information and considered the Footrot Prospect to be under-explored.

During February 2008, Quadrant Geophysics Pty Ltd completed an IP survey covering an area of 2.6km (north-south) by 1.8km (east-west) with a pole-dipole electrode array. Post survey processing of the raw data by Lachlan Star's geophysics consultant identified a number of discrete IP anomalies. Anomalies with a high IP response are likely to contain significant quantities of sulphide mineralisation. Whilst this does not provide proof of the occurrence of economically significant mineralisation, it does provide an excellent location to target with exploration drilling.

Princhester Mining Leases

Lachlan Star holds three mining leases at Princhester in Queensland (ML 5831, ML 5832 and ML 5846). ML5847 expired in October 2007 and formal relinquishment of this lease has been submitted to the Queensland Department of Mines and Energy.

ML 5846 is due to expire in May 2008. It is Lachlan Star's intention to relinquish this lease at this time. The remaining leases (ML 5831 and 5832) are current until 2023.

Note: The December 2007 Appendix 5B consolidated cashflow was prepared on the basis that Lachlan Star Limited was acquired by reverse acquisition on 15 October 2007 by Ord Investments Pty Ltd. That consolidated cashflow therefore reflected the continuation of the results of the legal subsidiary, Ord Investments Pty Ltd, with the consolidation of the cashflows of Lachlan Star Limited from 15 October 2007.

In the preparation of the 31 December 2008 half-year financial report it was determined that this transaction did not meet the requirements of a Business Combination (as defined under AASB 3) and that the reverse acquisition treatment was in appropriate. The current quarter and year to date cashflows presented above have been prepared using the restated half-year statutory financial report cashflows for the 6 months ended 31 December 2007.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
