### **Clough AMEC secures Engineering Services Contract extension from Chevron Australia**

Engineering and project services company Clough Limited (ASX:CLO) today announced that the Clough AMEC Joint Venture (Clough AMEC) has been awarded a contract extension worth more than \$20 million for the provision of engineering services to Chevron Australia's oil facilities off the north west coast of Australia.

Clough AMEC has been providing engineering services to Chevron under contract since 2008.

Contracted work scope includes conceptual studies, front end engineering design, detailed engineering, procurement support, development of construction work packs and construction planning. Work will be performed out of Clough AMEC's offices in Perth.

"We are pleased to extend our long-term relationship with Chevron to support their Western Australian oil operations" said Clough's Executive Vice President of Commissioning and Asset Support, Max Bergomi.

"This is an important contract for our Commissioning and Asset Support business and we will continue to work closely to help achieve operational excellence for these facilities".

"This contract extension is testament to Clough AMEC's collaborative strength in the provision of Brownfield services and we look forward to working with Chevron to achieve their long-term objectives, safely and sustainably" said AMEC's Executive Vice President, Asia Pacific, Garry Dryburgh.

Clough AMEC is a 50/50 incorporated joint venture established in 2004 to provide engineering, operations and maintenance services to clients in the Australasian hydrocarbons industry. The group's asset support project portfolio includes contracts in Australia, New Zealand and Papua New Guinea.
