EXPLORATION & DEVELOPMENT PROGRESS DURING THE QUARTER

REPUBLIC OF NORTH MACEDONIA

PLAVICA HIGH SULPHIDATION EPITHERMAL GOLD-COPPER-SILVER PROJECT (*Figure 1*)

The completed Mining Project was submitted to the Ministry of Economy in the Government of North Macedonia on 23 March 2021. It has subsequently passed the assessment by the Audit and Revision Committee appointed by the Ministry of Economy on 31 May 2021. The completion and reporting of the ongoing environmental studies is the last required submission for the Application of Mining Approval. During the quarter a nursery was set up in preparation for rehabilitation after mining is initiated. Agreements with landholders are also ongoing. Hydrogeological studies are nearly complete.

'CleanTech' or Clean Mining is the processing technology adopted in Plavica's Mining Project. The Clean Mining technique uses a non-toxic, water soluble, non-flammable inorganic compound to extract gold after the crushing and milling processes are completed.

The project lies within the Gaeta Goldfield and has undergone previous exploration for gold, uranium and base metals, with numerous historical gold workings located throughout the area. Historical mining was primarily focused on the Pioneer Reef which was the largest producer, but mining activities also included several other reefs including Gympie, Lord Nelson, West Yorkshire and Happy Jack.
