

ASX Release via e-lodgement 12 October 2018

## Report for the quarter ended 30 September 2018

- Step out drill program completed at Wonder North Deeps to test down dip extensions to high-grade gold mineralisation
- Program comprised four approximate 260 metre RC precollar holes with NQ Diamond tails completed for a total 1,951.5 metres.
- All core has been logged, cut and submitted for assaying with results due by the end of October 2018
- Company secures funding for resource drilling and working capital through loan agreement with major shareholder Zeta Resources Limited

Bligh Resources Limited (ASX: BGH) ("Company") is pleased to advise that during the reporting period a series of four diamond tailed drill holes were completed at the Bundarra Project. The four holes comprised of approximately 260 metre RC pre-collars followed by up to 255 meters of NQ diamond tails to test for extensions to a high-grade gold shoot which plunges to the southeast from immediately beneath the southern end of Wonder North pit. The previous diamond drilling at Wonder North Deeps intersected a significant structure hosting gold grades up to 5.3 grams per tonne over a down hole width of 26 metres (BGH, ASX announcement 6<sup>th</sup> Feb. 2018). Refer to figure 1.

#### **Drilling Program Details & Outcomes**

Total metres drilled for the four holes equalled 1,951.5 metres made up from 1057 metres of RC pre-collars and 894.5 metres of NQ diamond tail. The holes tested the down plunge and along strike extent of a high-grade gold shoot delineated in previous drill programs (BGH, ASX announcements 14<sup>th</sup> Dec 2016 & 6<sup>th</sup> Feb 2018). All four holes intersected the steep dipping host structure containing significant quartz veining with associated sulphides and alteration as identified in shallower drill holes (BRC002 and 003) which pieced the shoot approximately 90 metres up dip from the current drilling.

The 4 drill holes have tested the potential down plunge component on a nominal 50 metres along strike by 90 m down dip spacing over an approximate 130 m of strike.

The Company looks forward to providing details of the assay results in the near future.

#### **Company Funding**

The Company's 88% shareholder Zeta Resources Limited has agreed to provide Bligh up to \$1,000,000 in funding for drilling and working capital requirements. General Terms of the Loan Facility Agreement are uncomplicated and the drawn down loan attracts an interest rate of 8 % per annum.

The term of the facility is one year and on receipt of a repayment notice, Bligh will have two months to complete a capital raising to repay any outstanding funds. Zeta has agreed to take up its full entitlement in any capital raising undertaken to meet the repayment notice.

#### Planned Work for the December Quarter.

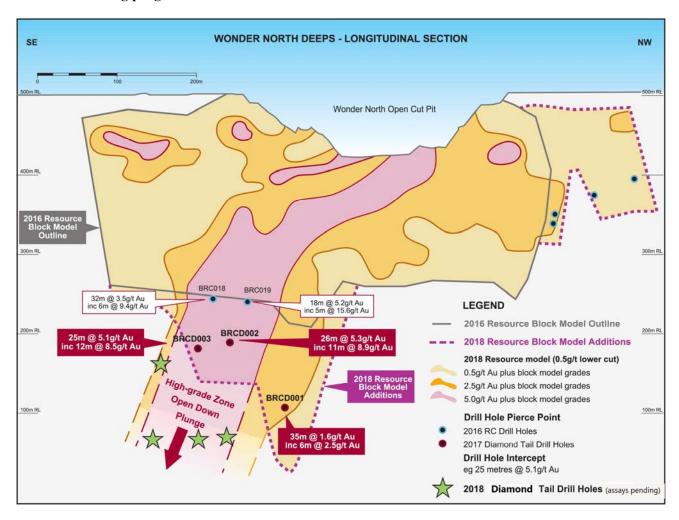

Following the release of assay results, the company intends to update the data base and the resource estimate at the Wonder North project. Results will also determine the extent of future drilling programs at this location.

Jamie Sullivan
Executive Director
12 October 2018

#### **About the Bundarra Gold Project**

The Bundarra Gold Project lies within the Norseman-Wiluna greenstone belt of the Archaean Yilgarn Craton, approximately 65km north of Leonora in the Eastern Goldfields region of Western Australia.

The project covers an area of 26.57 km<sup>2</sup> and consists of five Mining Leases, five Prospecting Licences and one Miscellaneous Licences. To date, more than 6,675 holes have been drilled with an accumulated drill depth of more than 210,000m.

The Company has committed to futher exploration programs aimed at expanding its gold resource inventory presently defined near to and beneath the existing open pits within the project area. The Company priority focus is to define additional high resource located below the Wonder North open pit. The mineralisaed structure at the Wonder North is a significant structure that extends from the base of the open pit to at least 350 metres. Diamond and RcC drilling has returned high grade results over 25 metre widths grading up to 5 g/t. Mineralisation remians open at depth and further drilling is underway to build on the high grade undeground resource.

The project hosts a JORC 2012 compliant ineral Resources estimated to contain 8.2 million tonnes averaging 2.2 g/t Au for a total of 580,000 ounces of gold across five deposits. Refer to table 1.

#### Notes:

- 1. Mineral Resources are based on JORC Code 2012 definitions.
- 2. A cut-off grade of 0.5 g/t gold has been applied.
- 3. Rows and columns may not add up exactly due to rounding.

The information in this report that relates to Mineral Resources is based on information compiled by Mssrs Steve Rose & **Dmitry Pertel whom are Fellows of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Rose & Pertel** are full-time employees of CSA Global Pty Ltd and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which they have undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves". Mr Rose & Dmitry consents to the inclusion of such information in this report in the form and context in which it appears.

The information in this report that relates to Exploration Results is based on information compiled by Mr Mark Gunther who is a member of The Australasian Institute of Geoscientists. Mr Gunther is a Principal Consultant with Eureka Geological Services. Mr Gunther has sufficient experience, which is relevant to the style of mineralization and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Gunther consents to the inclusion in the report of the matters based on information provided in the form and context in which it appears.

#### Qualifying Statement

This announcement contains statements that use speculative words such as "potential", "encouraging", "prospective", "projected" and "target zones". Such statements are based on the current expectations and certain assumptions of Bligh Resources management & consultants, and are, therefore, subject to certain risks and uncertainties. While Bligh is confident of their interpretations there is no guarantee that high-grade gold mineralisation results will be returned.

#### **Notes**

- 1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
