CMA announces contracting win at Port Hedland

CMA Corporation Limited (ASX: CMV) announced today that it had been awarded a substantial deconstruction and site clearance contract at Port Hedland in Western Australia.

The contract is for the deconstruction and clearance of buildings and conveying equipment at an ore handling plant at Port Hedland in the Pilbara region of Western Australia.

The contract represents a significant boost for CMA's Contracting Division. CMA was awarded the contract by one of its existing customers and brings the value of contracts awarded nationally over the last 2 months to more than \$10 million.

CMA Managing Director Peter Hatfull said the contract confirmed the Company's ability to secure major deconstruction contracts within the mining and heavy industrial sectors. "CMA has a number of key customers that are providing a regular source of revenue for the Contracting Division," said Mr Hatfull.

Mr Hatfull said work on the project would begin in September and is scheduled for completion before the end of the financial year.
