

## **Quarterly Activities Report for period ending 30 June 2008**

### **Highlights**

EPC 1149 Blackall granted on 22 April 2008.  
Drilling commenced on EPC1149  
Completed clearing of over 50 km of drill lines  
A total of 2,946m of drilling completed in 35 open (Rotary Air Blast) holes, with coal intersected in most holes.  
Establishment of a company office and staff accommodation facility in Blackall  
Application for access approval pending on Norwich Park EPC 1066

### **Blackall EPC 1149**

Department of Mines and Energy formally granted EPC 1149 on 22 April 2008. Access approvals have been granted and clearing of drill lines commenced in early June.

Exploration drilling commenced on 13 June 2008 and a total of 35 RAB (Rotary Air Blast) holes were drilled up to 30 June 2008. Exploration at this stage has focussed on the south-east quarter of EPC 1149 where historical exploration by Theiss had intersected coal. The aim of this drilling has been to confirm the historical data and to begin establishing the lateral extent and structure of the coal seams. A total of 2,946 m were drilled during the period. All drill holes are being geophysically logged using standard wireline logging techniques to accurately define the top and bottom of the coal seams and precisely target future core drilling.

Results of drilling have been encouraging with coal seams being intersected in most drill holes. Thickness of the seams varies from 0.5m to 4.0m with many holes intersecting multiple seams. Depth of the coal varies from less than 10m down to 100m. Further RAB drilling is planned during the coming weeks to better define the extent and continuity of the seams. Core sampling and testing for coal quality and limit of oxidation (LOX) will commence during July.

### **Norwich Park EPC 1066**

No additional work was completed on EPC 1066 during the Quarter. Previous exploration data is currently being carefully assessed to determine whether further drilling is warranted.

The previously planned program of deeper drilling in areas north east/south east of existing mines has been held over while work focuses on the Blackall tenement. Access agreements are being negotiated to enable drilling program to commence if the data review proves positive.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** [ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic \(if any\) must be complied with.](#)
