## **ASX Announcement**

14 July 2011

### **CathRx Submits CE Mark application for its Variable Loop Catheter**

Cardiac catheter manufacturer CathRx Ltd (ASX:CXD) today announced that it had submitted an application for CE Marking of its Variable Loop Catheter. Designed for the treatment of atrial fibrillation, the Variable Loop Catheter will be the first catheter in the Company's second generation device range.

CathRx Chief Executive Officer, Jeff Goodman said, "Our second generation platform is designed to maximize re-manufacturability. The Variable Loop Catheter is our first device to utilize this new platform and will be followed by a therapeutic/ablation device."

End

#### **About CathRx**

CathRx is a medical device company which designs and manufactures reprocessable cardiac catheter solutions for the treatment of people suffering from electrical problems of the heart known as cardiac arrhythmias. CathRx's proprietary diagnostic and therapeutic catheters are designed to give physicians the tools to cost effectively treat patients with speed, safety and precision.

#### **About cardiac arrhythmias**

Cardiac arrhythmia describes a group of increasingly common conditions where there is abnormal electrical activity in the heart. The beating of a normal heart is controlled by electrical impulses. When these impulses are uncoordinated the heart fails to function properly. This can result in complications ranging from fatigue to stroke and even death. More than 10 million people worldwide suffer from abnormal heart rhythms. Atrial fibrillation is the most common form of arrhythmia and affects over 5 million people worldwide. Current drug therapies often fail to control the problem and can have side effects. Cardiologists worldwide are increasingly using cardiac catheters to diagnose and successfully treat arrhythmias.
