

Sydney, Australia – 28 July 2004

eServGlobal reports OEM Marketing Agreement MOU with Comverse.

eServGlobal continues growth momentum with a strategic partnership with the world's largest telecommunications messaging software company.

eServGlobal Limited (ASX: ESV), a worldwide supplier of independent and flexible network intelligence systems, today reports that it has signed a Memorandum Of Understanding (MOU) with Comverse, for the provision of eServGlobal software and services as components of Comverse delivered solutions, under an Original Equipment Manufacture (OEM) agreement to be concluded within three months.

Comverse, a unit of Comverse Technology, Inc. (NASDAQ: CMVT), and the world's leading supplier of software and systems enabling network-based multimedia enhanced communication services, will incorporate eServGlobal's specialized IN (Intelligent Networking) software products into solutions for new and existing customers.

Mr Patrick McGrory, CEO of eServGlobal, said, "we are proud to have been selected by Comverse, the most significant player in our industry, to assist them in delivering next-generation enhanced services to their massive customer base, bringing the benefits of our focus on innovative new services which reduce the cost to serve."

The two companies are already engaged in marketing and product integration activity and the MOU records the terms which will form the basis of the formal OEM agreement. "This is about time-to-market", said Patrick McGrory, "the global telecommunications market is moving again and both Comverse and eServGlobal intend to be at the forefront of innovation and service."

About eServGlobal
