**ARAFURA ANNOUNCES DETAILS OF  
KURINELLI GEOCHEMICAL SOIL SAMPLING  
22 November 2004**

Shareholders attending the Arafura Resources Annual General Meeting were advised of very encouraging results at the Kurinelli Project location 400 km north east of Alice Springs and 100 km east of the Stuart Highway.

In commenting on the results the Chairman Mr Peter Walker said “that this was the first program using modern exploration techniques used in this goldfield which was first discovered in the 1890’s”.

There were 822 soil samples collected over a wide spacing of 500m x 500m.

1. A core gold zone covering 15-20 square kilometers has been clearly defined and encompasses several hard rock prospects.
2. Peak gold values of 236 ppb Au supported by neighbouring 5-18 ppm Au values have defined a 2 kilometre x 500 metre primary target within the core gold zone.
3. Numerous other discrete gold anomalies have been identified some of which are adjacent to old workings.

For any further information please contact Mr Peter Walker Chairman 0411 714 142 or Mr IG (Mick) Muir 0417 942 818.
