ASX ANNOUNCEMENT

NAB 2020 Third Quarter Pillar 3 Report

National Australia Bank Limited (NAB) today released its Third Quarter Pillar 3 Report, as required under the Australian Prudential Regulation Authority Prudential Standard APS 330 *Public Disclosure*.

The report is attached to this announcement and available at:

<http://www.nab.com.au/about-us/shareholder-centre/regulatory-disclosures>

Section 1

Introduction

National Australia Bank Limited (NAB) is an Authorised Deposit-taking Institution (ADI) subject to regulation by the Australian Prudential Regulation Authority (APRA) under the authority of the *Banking Act 1959* (Cth). This document has been prepared in accordance with the quarterly reporting requirements of APRA Prudential Standard APS 330 *Public Disclosure*, which requires disclosure of information to the market relating to capital adequacy and risk management practices. APS 330 was established to implement the third pillar of the Basel Committee on Banking Supervision's framework for bank capital adequacy. In simple terms, the framework consists of three mutually reinforcing pillars.

Pillar 1 Minimum capital requirement	Pillar 2 Supervisory review process	Pillar 3 Market discipline
Minimum requirements for the level and quality of capital	Management's responsibility for capital adequacy to support risks beyond the minimum requirements, including an Internal Capital Adequacy Assessment Process (ICAAP)	Disclosure to the market of qualitative and quantitative aspects of risk management, capital adequacy and various risk metrics

This document provides information about risk exposures, capital adequacy and liquidity of the Group, being NAB and its controlled entities.

Amounts are presented in Australian dollars unless otherwise stated, and have been rounded to the nearest million dollars (\$m) except where indicated.

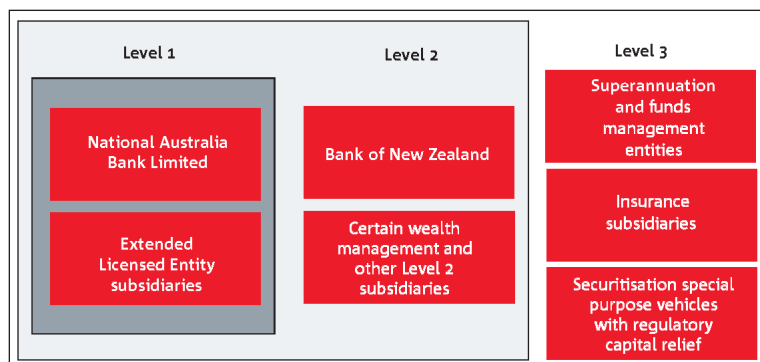

Capital Adequacy Methodologies

The Group uses the following approaches to measure capital adequacy as at 30 June 2020.

Credit Risk	Operational Risk	Non-traded Market Risk	Traded Market Risk
Advanced Internal Ratings-Based Approach (IRB)	Advanced Measurement Approach (AMA)	Internal Model Approach (IMA)	Standardised and Internal Model Approach (IMA)

Scope of Application

APRA measures capital adequacy by assessing financial strength at three levels as illustrated below.

Level 1 comprises NAB and its subsidiary entities approved by APRA as part of the Extended Licensed Entity.

Level 2 comprises NAB and the entities it controls, excluding superannuation and funds management entities, insurance subsidiaries and securitisation special purpose vehicles to which assets have been transferred in accordance with the requirements for regulatory capital relief in APS 120 *Securitisation*. Level 2 controlled entities include Bank of New Zealand and other financial entities such as broking, wealth advisory and leasing companies.

Level 3 comprises the consolidation of NAB and all of its subsidiaries.

This report applies to the Level 2 Group, headed by NAB, unless otherwise stated.

Section 2

Capital

Capital Adequacy [APS 330 Attachment C, Table 3a - f]

The following tables provide the risk-weighted assets (RWA) for each risk type.

	As at	
	30 Jun 20	31 Mar 20
	\$m	\$m
Credit risk		
Subject to IRB approach		
Corporate (including Small and Medium Enterprises (SME))	133,126	135,362
Sovereign	1,680	1,489
Bank	9,976	10,120
Residential mortgage	108,064	108,108
Qualifying revolving retail	2,903	3,258
Retail SME	6,442	6,326
Other retail	2,579	3,002
Total IRB approach	264,770	267,665
Specialised lending	60,053	59,632
Subject to standardised approach		
Residential mortgage	1,333	1,359
Corporate	4,429	4,720
Other	450	440
Total standardised approach	6,212	6,519
Other		
Securitisation exposures	5,225	5,197
Credit value adjustment	14,765	15,596
Central counterparty default fund contribution guarantee	117	137
Other ⁽¹⁾	8,825	9,804
Total other	28,932	30,734
Total credit risk	359,967	364,550
Market risk	11,017	10,035
Operational risk	49,189	50,604
Interest rate risk in the banking book	7,079	7,477
Total RWA	427,252	432,666

⁽¹⁾ Other includes non-lending assets and RWA overlay adjustments for regulatory prescribed methodology requirements.

The following tables provide the capital ratios and leverage ratio.

	As at	
	30 Jun 20	31 Mar 20
	%	%
Capital ratios		
Common Equity Tier 1	11.6	10.4
Tier 1	13.2	12.0
Total	15.8	14.6

Leverage ratio (%)	5.8%	5.2%	5.6%	5.5%

Section 3
Credit Risk

Information presented in this section excludes credit risk information in respect of certain securitisation exposures and non-lending assets. In particular, it excludes information on third party securitisation exposures and own asset securitisations with capital relief which have separate disclosures in Section 4 *Securitisation*.

Exposure at default throughout this section represents credit risk exposures net of offsets for eligible financial collateral.

Credit Risk Exposures [APS 330 Attachment C, Table 4a]

The following table provides a breakdown of credit risk exposures between on and off-balance sheet. The table also includes average credit risk exposure, which is the simple average of the credit risk exposure at the beginning and end of the reporting period.

Exposure type	As at 30 Jun 20				3 months ended 30 Jun 20
	On-balance sheet	Non-market related off-balance sheet	Market related off-balance sheet	Total exposure	Average total exposure
	\$m	\$m	\$m	\$m	\$m
Subject to IRB approach					
Corporate (including SME)	162,756	83,122	23,745	269,623	276,305
Sovereign	70,422	800	4,398	75,620	74,070
Bank	26,163	1,597	10,654	38,414	41,040
Residential mortgage	340,473	47,989	-	388,462	388,690
Qualifying revolving retail	4,308	5,406	-	9,714	9,948

Section 4
Securitisation
Recent Securitisation Activity [APS 330 Attachment C, Table 5a]

Underlying asset	3 months ended 30 Jun 20			Recognised gain or loss on sale
	Group originated capital relief	Group originated funding only	Group originated internal RMBS	
	\$m	\$m	\$m	\$m
Residential mortgage	-	-	48,751	-

There were no assets sold by the Group to securitisation special purpose vehicles in the three months ended 31 March 2020.

Securitisation Exposures Retained or Purchased [APS 330 Attachment C, Table 5b]

The following table provides the amount of securitisation exposures held in the banking book, broken down between on and off-balance sheet exposures.

Securitisation exposure type	As at 30 Jun 20			As at 31 Mar 20		
	On-balance sheet	Off-balance sheet	Total	On-balance sheet	Off-balance sheet	Total
	\$m	\$m	\$m	\$m	\$m	\$m
Liquidity facilities	132	1,446	1,578	120	1,768	1,888
Warehouse facilities	12,903	4,885	17,788	11,960	4,344	16,304
Securities	8,280	-	8,280	8,766	-	8,766
Derivatives	-	118	118	-	120	120
Total	21,315	6,449	27,764	20,846	6,232	27,078

The Group had \$736 million of derivative exposures held in the trading book subject to IMA under APS 116 *Capital Adequacy: Market Risk* as at 30 June 2020 (31 March 2020: \$650 million). The Group had no trading book exposures subject to APS 120 which were either risk-weighted or deducted from capital at 30 June 2020 or 31 March 2020.

The Group had no exposures subject to early amortisation in either the banking or trading book at 30 June 2020 or 31 March 2020.

Section 5

Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) presented in the disclosure template below is based on a simple average of daily LCR outcomes excluding non-business days.

The Group's LCR decreased marginally to 132% for the three months ended 30 June 2020. Average liquid assets have increased driven by material growth in the Group's deposit portfolio and recognition of the Term Funding Facility (TFF). The offsetting increase in net cash outflows also relates to the increase in deposits along with the impact of a Fitch single notch downgrade to NAB's long-term and short-term credit rating.

Liquidity Coverage Ratio Disclosure Template [APS 330 Attachment F, Table 20]

		3 months ended			
		30 Jun 20		31 Mar 20

24	Total net cash outflows		140,853		111,848
25	Liquidity Coverage Ratio (%)		132%		136%

⁽¹⁾ Unweighted inflow and outflow values are outstanding balances maturing or callable within 30 days.

⁽²⁾ Weighted values are calculated after applying caps to the New Zealand dollar (NZD) liquid asset holdings in excess of NZD LCR of 100%.

⁽³⁾ Modelling has been enhanced to more accurately reflect the stable nature of deposits covered by the Financial Claims Scheme. Prior period comparatives have not been restated.

Section 6

Glossary

Term	Description
Additional regulatory specific provisions	In line with APRA's July 2017 guidance "Provisions for regulatory purposes and AASB 9 Financial Instruments", regulatory specific provisions include collective provisions for facilities in Stage 2 with identified deterioration (that do not meet the two exception clauses per the APRA guidance), and Stage 3 in default. All other facilities are classified as general reserve for credit losses.
Additional Tier 1 capital	Additional Tier 1 capital comprises high quality components of capital that satisfy the following essential characteristics: - provide a permanent and unrestricted commitment of funds - are freely available to absorb losses - rank behind the claims of depositors and other more senior creditors in the event of winding up of the issuer - provide for fully discretionary capital distributions.
ADI	Authorised Deposit-taking Institution.
Advanced Internal Ratings-Based approach (IRB)	The process used to estimate credit risk through the use of internally developed models to assess potential credit losses using the outputs from the probability of default, loss given default and exposure at default models.
Advanced Measurement Approach (AMA)	The risk estimation process used for operational risk, combining internally developed risk estimation processes with an integrated risk management process, embedded within the business with loss event management.
Alternative Liquid Assets (ALA)	Assets that qualify for inclusion in the numerator of the Liquidity Coverage Ratio in jurisdictions where there is insufficient supply of high-quality liquid assets in the domestic currency to meet the aggregate demand of banks with significant exposure in the domestic currency in the Liquidity Coverage Ratio framework. The Committed Liquidity Facility and Term Funding Facility provided by the Reserve Bank of Australia to ADIs are treated as an ALA in the Liquidity Coverage Ratio.
APRA	Australian Prudential Regulation Authority.
APS	Prudential Standards issued by APRA applicable to ADIs.
Central Counterparty (CCP)	A clearing house which interposes itself, directly or indirectly, between counterparties to contracts traded in one or more financial markets, thereby insuring the future performance of open contracts.
CET1 capital ratio	CET1 capital divided by risk-weighted assets.
Committed Liquidity Facility (CLF)	A facility provided by the Reserve Bank of Australia to certain ADIs to assist them in meeting the Basel III liquidity requirements.
Common Equity Tier 1 (CET1) capital	The highest quality component of capital. It is subordinated to all other elements of funding, absorbs losses as and when they occur, has full flexibility of dividend payments and has no maturity date. It is predominately comprised of paid-up ordinary share capital, retained profits plus certain other items as defined in APS 111 <i>Capital Adequacy: Measurement of Capital</i> .
Corporate (including SME)	Corporate (including SME) consists of corporations, partnerships or proprietorships not elsewhere classified and includes non-banking entities held by banks.
Credit derivatives	Credit derivatives include single-name credit default and certain total return swaps, cash funded credit linked notes and first-to-default and second-to-default credit derivative basket products. ADIs may also recognise other complex credit derivatives that do not fall into the list above, that have been approved by APRA.
Credit Value Adjustment (CVA)	A capital charge to reflect potential mark-to-market losses due to counterparty migration risk for bilateral over-the-counter derivative contracts.
Default fund	Clearing members' funded or unfunded contributions towards, or underwriting of, a central counterparty's mutualised loss sharing arrangements.
Eligible Financial Collateral (EFC)	Under the standardised approach, EFC is the amount of cash collateral, netting and eligible bonds and equities. Under the IRB approach, EFC is limited to the collateral items detailed in APS 112 <i>Capital Adequacy: Standardised Approach to Credit Risk</i> . Recognition of EFC is subject to the minimum conditions detailed in APS 112.
Exposure at Default (EaD)	An estimate of the credit exposure amount an ADI may be exposed consequent to default of an obligor. EaD is presented net of eligible financial collateral.
Extended Licensed Entity	The ADI and any APRA approved subsidiary entities assessed as effectively part of a single 'stand-alone' entity, as defined in APS 222 <i>Associations with Related Entities</i> .
General Reserve for Credit Losses (GRCL)	An estimate of the reasonable and prudent expected credit losses over the remaining life of the portfolio of non-defaulted assets, as set out under APS 220 <i>Credit Quality</i> . The GRCL is calculated as a collective provision for credit impairment, excluding securitisation exposures and provision on default no loss assets. Where the GRCL (regulatory reserve) is greater than the accounting provision, the difference is covered with an additional top-up, created through an appropriation of retained profits to a non-distributable reserve.
High-quality Liquid Assets (HQLA)	Consists primarily of cash, deposits with central banks, Australian government and semi-government securities and securities issued by foreign sovereigns as defined in APS 210 <i>Liquidity</i> .
Impaired facilities	Impaired facilities consist of: - retail loans (excluding unsecured portfolio managed facilities) which are contractually 90 days past due with insufficient security to cover principal and interest - unsecured portfolio managed facilities that are 180 days past due (if not written off) - non-retail loans which are contractually past due and / or sufficient doubt exists about the ability to collect principal and interest in a timely manner - off-balance sheet credit exposures where current circumstances indicate that losses may be incurred.
Internal Model Approach (IMA) - Non-traded Market Risk	The approach used in the assessment of non-traded market risk. The Group uses, under approval from APRA, the IMA to calculate interest rate risk in the banking book for all transactions in the banking book.
Internal Model Approach (IMA) - Traded Market Risk	The approach used in the assessment of traded market risk. The Group uses, under approval from APRA, the IMA to calculate general market risk for all transactions in the trading book other than those covered by the standardised approach.
Leverage ratio	Tier 1 capital divided by exposures as defined by APS 110 <i>Capital Adequacy</i> . It is a simple, non-risk based supplementary measure to supplement the RWA based capital requirements. Exposures include on-balance sheet exposures, derivative exposures, securities financing transaction exposures and other off-balance sheet exposures.
Liquidity Coverage Ratio (LCR)	A metric that measures the adequacy of high-quality liquid assets available to meet net cash outflows over a 30-day period during a severe liquidity stress scenario.
Loss Given Default (LGD)	An estimate of the expected severity of loss for a credit exposure following a default event. Regulatory LGDs reflect a stressed economic condition at the time of default.
NAB	National Australia Bank Limited ABN 12 004 044 937.
Net write-offs	Write-offs, net of recoveries.

Term	Description
Past due facilities \geq 90 days	Well-secured assets that are more than 90 days past due and portfolio managed facilities that are not well secured and between 90 and 180 days past due.
Probability of Default (PD)	An estimate of the likelihood of a customer defaulting or not repaying their borrowings and other obligations in the next 12 months.
Qualifying revolving retail	Revolving exposures to individuals less than \$100,000, unsecured and unconditionally cancellable by the Group. Only Australian retail credit cards qualify for this asset class.
Risk-weighted Assets (RWA)	A quantitative measure of risk required by the APRA risk-based capital adequacy framework, covering credit risk for on and off-balance sheet exposures, market risk, operational risk and interest rate risk in the banking book.
Securitisation exposures	Securitisation exposures include the following exposure types: - liquidity facilities: facilities provided to securitisation vehicles for the primary purpose of funding any timing mismatches between receipts of funds on underlying exposures and payments on securities issued by the securitisation vehicle or to cover the inability of the securitisation vehicle to roll-over securities due to market disruption - RMBS: Residential mortgage-backed securities - warehouse facilities: lending facilities provided to securitisation vehicles for the financing of exposures in a pool. These may be on a temporary basis pending the issue of securities or on an on-going basis - credit enhancements: protection provided against credit losses to parties holding a securitisation exposure - securities: holding of debt securities issued by securitisation vehicles - derivatives: derivatives provided to securitisation vehicles, other than credit derivatives.
SME	Small and medium sized enterprises.
Specific provision for credit impairment	The provision assessed on an individual basis in accordance with Australian Accounting Standard AASB 9 <i>Financial Instruments</i> .
Standardised approach	An alternative approach to the assessment of credit, operational and traded market risk whereby an ADI uses external rating agencies to assist in assessing credit risk and/or the application of specific values provided by regulators to determine risk-weighted assets.
Term Funding Facility (TFF)	A facility provided by the Reserve Bank of Australia to certain ADIs to support lending to Australian businesses.
Tier 1 capital	Tier 1 capital comprises CET1 capital and instruments that meet the criteria for inclusion as Additional Tier 1 capital set out in APS 111 <i>Capital Adequacy: Measurement of Capital</i> .
Tier 1 capital ratio	Tier 1 capital divided by risk-weighted assets.
Tier 2 capital	Tier 2 capital includes other components of capital that, to varying degrees, fall short of the quality of Tier 1 capital but nonetheless contribute to the overall strength of an ADI and its capacity to absorb losses.
Total capital	The sum of Tier 1 capital and Tier 2 capital.
Total capital ratio	Total capital divided by risk-weighted assets.
Write-offs	A reduction in the carrying amount of loans and advances at amortised cost and fair value where there is no reasonable expectation of recovery of a portion or the entire exposure.
