Update to Placement and Share Purchase Plan Timing

Not for release to US wire services or distribution in the United States

Aura Energy Limited (ASX: AEE, AIM: AURA) ("Aura" or "the Company") provides an update in respect of the placement and share purchase plan ("SPP") previously announced on 18 March 2024.

The Company has received an additional request from Mr Philip Mitchell, a director of the Company ("**Director**") who seeks to invest in the placement, to raise an additional \$30,000 (subject to shareholder approval). The revised structure of the placement will be detailed in the Company's notice of meeting, to be dispatched to shareholders on or around Friday, 19 April 2024.

Other than the additional Director participation, the terms of the placement and SPP will remain unchanged.

Together with the SPP, the Company seeks to raise up to approximately \$18.2 million (before costs) under its capital raising. Funds raised will be used towards:

- assisting the Company with pre-development activities at the Tiris Project in Mauritania, with a final investment decision expected in 2024 and production expected in 2026;
- supporting development of the Häggån Project in Sweden; and
- providing additional working capital.

About Aura Energy (ASX: AEE, AIM: AURA)

Aura Energy is an Australian-based mineral company with major uranium and polymetallic projects in Africa and Europe.

The Company is focused on developing a uranium mine at the Tiris Uranium Project, a major greenfield uranium discovery in Mauritania. The February 2024 FEED study demonstrated Tiris to be a near-term low-cost 2Mlbs U308 pa near term uranium mine with a 17-year mine life with excellent economics and optionality to expand to accommodate resource growth.

Aura plans to transition from a uranium explorer to a uranium producer to capitalise on the rapidly growing demand for nuclear power as the world shifts towards a decarbonised energy sector.

Beyond the Tiris Project, Aura owns 100% of the Häggån Project in Sweden. Häggån contains a global-scale 2.5Bt vanadium, sulphate of potash ("SOP") and uranium resource. Utilising only 3% of the resource, a 2023 Scoping Study outlined a 27-year mine life based on mining 3.5Mtpa.
