## **eServGlobal selected to supply MVNO Service Platform to United Mobile**

***eServGlobal solution will support United Mobile's strong growth phase of leading-edge global mobile communications services***

eServGlobal Limited (ASX:ESV & LSE:ESG), a specialised supplier of large-scale Intelligent Networking (IN) software and services to international telecommunications carriers, today announced that United Mobile Liechtenstein AG has selected eServGlobal's ChargingMax solution to support the next phase of their strong growth.

eServGlobal's ChargingMax will provide the charging, account management, balance handling, multi-network connectivity and call initiation capabilities for United Mobile's worldwide services. United Mobile provides roaming mobile subscribers with substantial cost advantages worldwide, based on an intelligent callback method.

"United Mobile continues to experience continued strong subscriber growth", said Sven Donhuysen, President & CEO, at United Mobile. "We looked for a new, carrier class service platform to cope with this increase in traffic and customer demand for international service functionality, as well as to support our global expansion and our plans to connect to more MNOs in the near future. We selected eServGlobal because of their extensive capabilities for MNOs and MVNOs and their strong understanding of networks. Combining existing eServGlobal software elements provided us with a Mobile Service Platform tailored to our needs, all built from existing, proven, carrier-class modules."

"eServGlobal leads the market in tailored configurations for MVNOs", said Ms Coralie Mesnard, Vice President of Marketing at eServGlobal. "We provide charging and network solutions which help to drive the business of an MVNO. By understanding the importance to MVNOs of price/performance, real-time business control and multi-network connectivity, eServGlobal delivers MVNO Service Platforms that are more relevant and better value to the fast growing MVNO market."

### **About United Mobile**

United Mobile is a licensed Mobile Virtual Network Operator and provides cost-effective and high-quality global mobile communication services through its own network infrastructure and global SIM cards.

United Mobile has developed a revolutionary technology, eliminating the expensive roaming charges. United Mobile offers free incoming international calls in over 80 countries and international outgoing calls at worldwide low rates. Whether going abroad just once a year, taking weekend breaks away or travelling regularly, United Mobile enables to call mobile and save up to 90% costs on calls worldwide.

United Mobile emphasises Swiss quality and precision standards. To ensure the quality of the network connections, United Mobile uses a special developed technology. This enables United Mobile to keep up the high quality standard – worldwide.

United Mobile operates its services in more than 120 countries with more than 200 roaming partners and is continuously expanding its coverage. More information can be found at: [www.united-mobile.ch](http://www.united-mobile.ch)
