

ASX ANNOUNCEMENT

Green Bay Copper-Gold Project, Canada

Exploration drive underway, paving way for accelerated drilling and strong Resource growth

AuTECO's maiden drilling program at Green Bay well advanced, with first assays expected within weeks

KEY POINTS

- Mining of a 750m exploration drill drive has commenced at Green Bay
- The exploration drive will enable AuTECO to drill faster, more efficiently and more accurately as part of its strategy to grow the Green Bay Resource of 39.2Mt at 2.1% for 811,000t CuEq¹
- The drive will provide additional drilling platforms to infill the outstanding historic intersections down plunge of the existing Resource. These include:
 - 22.6m @ 4.4% Cu, 18.0m @ 4.6% Cu, 19.2m @ 10.3% Cu (all ~true width)
 - 102m @ 1.7% Cu true width (~460m step-out from previous hole, deepest hole drilled)
- This mining is part of the Phase 1 resource growth campaign, which consists of 40,000m of underground diamond drilling and ramping up to three drill rigs in Q1 2024
- Samples from the first diamond drillholes have been submitted for analysis, with results expected during December 2023
- AuTECO remains well funded with \$24m in the bank as at 24 October 2023 to complete Phase 1 of its resource growth strategy

AuTECO Minerals Limited (ASX: AUT) is pleased to advise that it has started underground mining of a 750m exploration drill drive at the Green Bay Copper-Gold project in Newfoundland, Canada.

This underground development is a key part of AuTECO's strategy to rapidly grow the high-grade copper-gold Resource which stands at 39.2Mt at 2.1% for 811,000t CuEq contained metal.¹ Phase 1 consists of 750m of mining development and 40,000m of underground diamond drilling.

The development is positioned to effectively target down dip extensions of both the upper high-grade copper-gold VMS horizons and the bulk Lower Footwall Zone, which returned an intersection of 102m @ 1.7% copper 460m from the starting point of the exploration drive.

Managing Director Steve Parsons said: *"We are moving rapidly to grow the Resource by infill drilling these areas of known high-grade copper. The drive will enable us to do this quickly and efficiently, with the first results expected next month and strong newsflow to follow from then".*

¹ The resource is a Foreign Estimate prepared in accordance with Canadian National Instrument 43-101. A competent person has not done sufficient work to classify the Foreign Estimate as Mineral Resources in accordance with the JORC Code. It is uncertain that following evaluation and/or further exploration work that the Foreign Estimates will be able to be reported as Mineral Resources in accordance with the JORC Code.

The exploration drill drive will be operated by AuTECO underground mining personnel utilising a new twin boom Sandvik DD321 jumbo, enabling excellent productivity and reduced unit costs in comparison to the smaller single boom equipment previously deployed on the site.

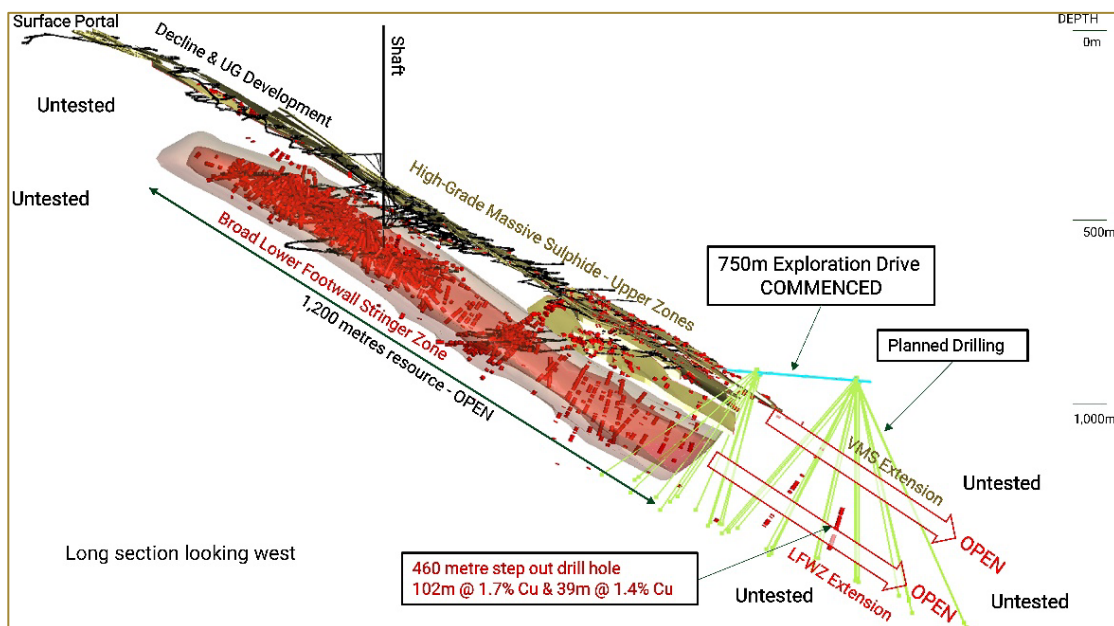

Drilling on the upper VMS zones continues at the Ming Mine, with the first three holes submitted to the laboratory for analysis. Results are expected this quarter.

As the exploration drive advances, the number of drill rigs is expected to increase to three during the first quarter of 2024.

The Company is funded with \$24 million (as at 24 October 2023) to complete Phase 1 mining and drilling activities.

AuTECO personnel on-site with the new Sandvik DD321 Jumbo. From Left to Right: Gus Simbanegavi (GM Operations), Sally Noseworthy (Senior Geologist), Kevin Lindloff (Underground Shift Boss), Darren Cooke (CEO), Kevin Tomlinson (Non-Executive Director), Steve Parsons (MD), and Juan Gutierrez (Group Chief Geologist).

Long section showing the planned exploration drive development.

ABOUT THE GREEN BAY COPPER-GOLD PROJECT

The Green Bay project is located on the Baie Verte peninsula of north-east Newfoundland, Canada. The province of Newfoundland and Labrador has been recognised as a top four global mining investment jurisdiction in the 2022 Fraser Institute Annual Survey of Mining Companies.

The Green Bay Copper-Gold project comprises numerous assets, including:

- Ming underground mine
- Little Deer exploration project
- Nugget Pond processing plant
- Concentrate storage facility at Goodyear's Cove port

The Ming mine is a fully operational underground mine with accessible decline, 650m shaft and other surface infrastructure.

The Green Bay Copper-Gold project currently hosts a high-grade copper resource of 39.2Mt @ 2.1% for 811,000t CuEq with significant potential to grow.

The Company has a clear strategy to:

- Rapidly grow the resource at Ming through investment in drilling; and
- Demonstrate the size and scale of a globally significant high-grade copper-gold asset.

AuTECO sees opportunity to create shareholder value by rapidly expanding the already impressive resource at the Ming underground mine through investment in drilling. The existing underground infrastructure will fast-track work, with drill positions immediately accessible.

Milestone	Q4 23	Q1 24	Q2 24	Q3 24	Q4 24

Resource & Upscale Studies				●	

Phase 1 of the growth program plans for development of a 750m exploration drive in addition to 40,000m of diamond drilling.

This program will test the down-plunge extension of the Lower Footwall Zone, where the deepest hole completed to date returned 102m @ 1.7% copper.

ABOUT AUTECO MINERALS

AuTECO Minerals Ltd (ASX:AUT) is an emerging copper-gold company focused on advancing high-grade Green Bay Copper-Gold project in Newfoundland, Canada.

The Green Bay Copper-Gold Project currently hosts a mineral resource prepared in accordance with Canadian NI 43-101 of 39.2Mt at 2.1% for 811,000t CuEq. The Company has clear strategy to rapidly grow the copper-gold resource to demonstrate a globally significant copper-gold asset. AuTECO intends to immediately commence a 40,000m diamond drilling program.

AuTECO holds a 70% interest in the high-grade Pickle Crow Gold Project in Ontario. The current Inferred Resource stands at 11.9Mt at 7.2g/t for 2.8Moz gold, with exceptional discovery potential on the 500km² tenement holding.

The Company also holds a 90% interest in the Limestone Well Vanadium-Titanium Project in Western Australia.

For further information regarding AuTECO Minerals Ltd please visit the ASX platform (ASX:AUT) or the Company's website <https://www.autecominerals.com>

COMPLIANCE STATEMENTS

The Company first announced the foreign estimate for the Green Bay Project on 31 August 2023. The Company confirms that the supporting information included in the announcement of 31 August 2023 continues to apply and has not materially changed.

Metal equivalents have been calculated at a copper price of US\$8,295/t, gold price of US\$1,912/oz and silver price of US\$22.59/oz. Individual grades for the metals are set out at Appendix A of this announcement. Copper equivalent was calculated based on the formula $CuEq(\%) = Cu(\%) + (0.74112 \times Au(g/t)) + (0.00876 \times Ag(g/t))$. No metallurgical recovery factors have been applied to the in-situ resource. It is the Company's view that all elements in the copper equivalent calculation have a reasonable potential to be recovered and sold.

Historical exploration results at the Green Bay Project referred to in this announcement were first reported in accordance with ASX Listing Rule 5.7 in AuTECO's ASX release dated 31 August 2023.

The Mineral Resource Estimate for the Pickle Crow Project referred to in this announcement was first reported in the Company's ASX release dated 4 May 2023, titled "High-Grade Inferred Gold Resource Grows to 2.8Moz at 7.2g/t".

AuTECO confirms that it is not aware of any new information or data that materially affects the information included in the original announcements and that all material assumptions and technical parameters underpinning the estimates in the original announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement.

FORWARD LOOKING INFORMATION

This announcement may contain certain forward-looking statements and projections, including statements regarding AuTECO's plans, forecasts and projections with respect to its mineral properties and programs. Although the forward-looking statements contained in this release reflect management's current beliefs based upon information currently available to management and based upon what management believes to be reasonable assumptions, such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. For example, there can be no assurance that AuTECO will be able to confirm the presence of Mineral Resources or Ore Reserves, that AuTECO's plans for development of its mineral properties will proceed, that any mineralisation will prove to be economic, or that a mine will be successfully developed on any of AuTECO's mineral properties. The performance of AuTECO may be influenced by a number of factors which are outside the control of the Company, its directors, staff or contractors. The Company does not make any representations and provides no warranties concerning the accuracy of the projections, and disclaims any obligation to update or revise any forward looking statements/projects based on new information, future events or otherwise except to the extent required by applicable laws.

- AuTECO Minerals Limited cautions that mineral resources for the Green Bay Copper-Gold project, incorporating the Ming Deposit and Little Deer Complex, are not reported in accordance with the JORC Code (2012 Edition). A Competent Person has not yet completed sufficient work to classify the resources as mineral resources that satisfy the guidelines provided in the JORC Code (2012 Edition).
- All resources have been prepared in accordance with Canadian National Instrument 43-101. Please refer to ASX announcement dated 31 August 2023 for additional technical information relating to the foreign estimate.
- Mineral resources have been reported at a 1.0% copper cut-off grade.
