Fenix Resources Limited (ASX: FEX) (Fenix or the Company) advises the Company has entered into a binding agreement with Athena Resources Limited (**ASX:AHN) (Athena)** whereby Fenix will subscribe for up to A\$1,000,000 worth of convertible notes (**Notes**) in Athena.

The funding to be supplied by Fenix is intended to assist Athena in completion of the pending Scoping Study of Athena's Byro Magnetite Project in Western Australia's Mid-West region.

The Notes are available in two tranches, with the first tranche to be issued using Athena's available placement capacity under listing rule 7.1, and the second tranche to be issued subject to Athena shareholder approval. If shareholder approval is not obtained within three months, the second tranche will not be issued. The Notes have a maturity date of twelve months from the date the first tranche is issued and accrue interest at the rate of 8% per annum.

If both tranches of notes are issued and Fenix elects to fully convert the Notes at the conversion price of \$0.002/share, Fenix will, subject to any required Athena shareholder approvals, become the largest shareholder in Athena with an approximate shareholding of 31.8% (plus any additional shares issued for conversion of interest accrued). A summary of the material terms of the Notes is included below in Schedule 1.

The Byro Magnetite Project is located 340km north-east of the port of Geraldton and hosts a magnetite mineral resource. Athena is working to complete a Scoping Study for the production of a high grade, low impurity magnetite concentrate that would demand a premium price and could be hauled to Geraldton for export.
